

Hawaiian HUNA

In this introduction to the ancient knowledge of Hawaii you will learn Seven Sacred Principles. When integrated, these principles bring about a state of oneness and peace.

Chakras

Discover seven chakras which form of the major energy systems of the body.

Many people are now realizing that negative emotions and limiting decisions can store in the chakras and inhibit the distribution of energy around the body causing physical and mental illness. With this awareness, you can begin to clear any unwanted or stuck energy.

Crystals

Recognize the beneficial properties of many crystals.

Understand the scientific reasons for their healing abilities. Practice this knowledge by Giving and Receiving a Crystal Healing on the chakras.

Learn how to cleanse the crystals of unwanted energy.

Sacred Geometry

Re-awaken yourself to the basic building blocks of all physical creation as you learn the geometric symbols that encode us all.

Experience a journey with these symbols that transcends time and space and creates deep positive change within.

Auras and Spiritual Bodies

Since the beginning of time clairvoyants have described being able to see colours displayed in the aura. Find out what the different colours mean?

Research at NASA has measured electronically that there are many energy bodies which exist outside of the physical body. Learn what they are, the geometric symbols for them and their purpose to your evolvment.

Sound & Breath

Practice using sound to expand your consciousness.

Toning vibrations can assist in opening up the third eye and balancing your body and the environment.

Release stress and toxins from the cellular memory of the body with an Ancient Breathing Technique.

Awakening The Codes Within Healing Channel Training

DAY ONE

Chakras

Take a wonderful and educational journey into how your own system works by learning about your chakras.

As we travel through the body you will discover that each chakra has a specific purpose, which when harnessed and developed, can accelerate your spiritual growth.

Crystal Healing

On this first day you will also discover properties of many crystals, gems and minerals.

Learn how to utilize their frequencies to release energetic holding patterns and bring more energy and alignment to the body.

By the end of the first day you will be ready to give and receive a crystal healing.

DAY TWO

Spiritual Psychology

Our bodies reveal our experiences and beliefs, find out more about the underlying patterns that may be influencing your decisions in life and therefore your relationships with others.

Outer Bodies

To build on the seven chakras, you will now venture out into the seven energy fields that exist outside of the physical body. As the aura is the second of these bodies, one of the things you will learn is how colours form and become displayed in the aura, and what these colours mean.

DAY THREE

Hawaiian Huna

An Introduction to the language of an Ancient Hawaiian Chant that awakens the dna and reminds us how to live more fully in the truth of our divine spirituality.

Feeling Energy Fields

Each one of us is sensitive to some extent to the energy of others, but have you ever notice how the energy fields of others can support or inhibit your ability to be comfortable about yourself?

Having the distinction between what is your energy, and what is not, is a skill well worth developing.

DAY FOUR

Sacred Geometry

The next step of discovery is Sacred Geometry. Once you have learned how to recognize these symbols that form the matrix of everything that exists in this universe, you will be guided through an experience to re-awaken consciousness in twelve of your chakras.

Then from a deep place within, you will have the opportunity to align to your highest purpose.

Life Breath

Breath is life and holding negative energy stops the free flow of life. On this last day, you will have the opportunity to experience a technique, which has been handed down from the masters. Its purpose is to help us release from the cellular memory, negative emotions, limiting decisions, toxic chemicals, and the aging effects of stress.
